

DERMEDICS™ Ceramide Creamy Cleanser

Ceramide Creamy Cleanser is a soothing creamy cleansing emulsion designed to assist in calming the discomfort associated with weak, itchy, highly irritated or reddened skin.

A unique formula, rich in skin-identical ceramides 1-3-6 can be used as an all in one product: facial cleanser, moisturiser and nourishing creamy mask with softening effect.

Overview

This product is ideal for following procedures:

- Pre-treatments cleansing and softening procedures (effective but gentle)
- Targeted recovery of the damaged lipid barrier of the skin
- Recommended especially during Winter season while the level of ceramides in skin decreases
- Beauty procedures associated with sensitive skin prone to allergy, redness and inflammation
- Specialistic beauty procedures, as well as daily skin care of delicate skin that demands special care (skin of diabetics, skin of people with hypothyroidism)

General dermatological benefits

- Reinforces the natural lipid barrier of dry and ageing skin
- Improves long term moisturisation and reduces transepidermal water loss (TEWL)
- Provides a rich portion of ceramides which are the key regulator of cell growth
- Stimulates DNA synthesis and cell division
- Supports in inhibition of apoptosis (a process of programmed cell death – PCD)
- Protects the skin from external influences and irritations
- Helps to balance the oily skin and hypersecretion of sebaceous glands (which is well known as one of four major players in pathogenesis of acne vulgaris)
- Contains linoleic acid (a component of ceramide EOP) which supports dermatological procedures against skin disorders, such as: psoriasis, ichthyosis, acne (vulgaris), atopic dermatitis, surfactant induced dermatitis

Benefits for skin prone to acne treated with isotretinoin medication (Retin A & the like)

Thanks to the rich content of emollients (lipid components) that form thin layer on skin's surface the cleanser provides long-lasting protection against external irritations and promotes following benefits for the skin prone to acne:

- Calms inflammations induced by alcohol contained in preparations for external use in medical therapies against acne
- Reduces the discomfort of the skin associated with isotretinoin medication (dehydration, itching)
- Accelerates healing process of the tissue during desquamatory process caused by isotretinoin
- Deeply nourishes the skin and calms inflammation associated with acne
- Supports in reduction of red and purple spots left by acne

Additional benefits:

- Economic benefits: one product for all cleansing procedures (cleanser, moisturiser, nourishing softening creamy mask)
- Time savings: cleansing procedures in beauty salon are shorter in time (with this product there is no need to use separate gel, cleansing milk or toner)

Directions for use

- Recommended for skin of all ages for normal to combination skin
- Unisex: for women and men
- Skin with discomfort associated with weak, itchy, highly irritated or reddened skin
- Skin with strong dehydration (like in diabetics and people with hypothyroidism)
- Skin with lack of elasticity and firmness
- Problematic skin prone to acne and to the formation of whiteheads and blackheads (comedo)
- Skin with acne during isotretinoin medication (Retin A & the like)

Active Ingredients

Calming components: pure Dexpanthenol (D-panthenol 75%). **Anti-irritant agents:** Licorice, Boswellia. **Protective anti-oxidants:** Green Tea. **Lipid components (emollients):** Isononyl Isononanoate (silky emollient used in products for infants and babies), Coconut Oil (Decyl Cocoate), Hydrolipidic Dermollient (Lauryl Oliviate), Ceramide NP, Ceramide AP, Ceramide EOP, Phytosphingosine, Cholesterol. **Humectants (moisturising agents):** Allantoin. **Cleansing components:** Sodium Lauroyl Sarcosinate, Lauric Acid (Sodium Lauroyl Lactylate).
